Ladder Rack

I N S T A L L A T I O N I N S T R U C T I O N S

ICC's Ladder Rack, known as CMSLink, is sturdy enough to stand up to the competition with its 16 gage steel construction. Its corrosion resistant, black, powder coat finish matches ICC's cable management and distribution racks along with all the rack panels, shelves, and drawers.

Unlike the competition, our ceiling mount kit comes complete with the ceiling and ladder interface brackets and the two 6-foot rods required to mount them together and to the ladder section. ICC's cable retaining posts come in pairs, so you get two fence posts to put on opposite sides or the same side of the ladder.

Straight ladder sections are available in 5 and 10-foot lengths and are 12 inches wide. Ladder Supporting Kits include J-bolts to secure ladder sections, but do not include hardware to mount to wall, ceiling, or floor.

ICCM SLAWSK Perpendicular Angled Wall Support Kit

- Includes 1 support bracket and 2 J-Bolts
- Wall fasteners are Not Included
