Digital Clock Wire Guard

Analog Clock Wire Guard

Valcom offers a variety of mounting options for your clocks in order to accommodate all sorts of infrastructures, including surface and double mount housing, as well as, wire guards for clock protection.

The double mount housing, which allows for a dual-faced time display is ideal for hallway applications or larger facilities where seeing the time from multiple vantage points is necessary.

Valcom's heavy duty welded steel wire guards provide protection for clocks in gymnasiums and other high damage potential areas.

Features & Advantages

Double-Sided Brackets
Attaches to the wall or ceiling and provides high clock visibility for public areas.

Surface Mount Housing
The housing is intended for wired and wireless round analog clock retrofit applications where in wall cabling is impractical.

Wire Guards
Heavy duty steel wire resists impact damage.
